Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - Claims 1-13 and 17-19, drawn to candidate set determination and allocation, classified in class 455, subclass 436.
 - II. Claims 14-16, drawn to particulars of filtering steps in a particular rake receiver, classified in class 455, subclass 334.

The inventions are distinct, each from the other because of the following reasons:

- 2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination II has separate utility such as filtering energy samples using a rake receiver. See MPEP § 806.05(d).
- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 4. Because these inventions are distinct for the reasons given above and the search required for Group I. is not required for Group II. restriction for examination purposes as indicated is proper.
